### ***Allowable Subject Matter***

1. Claims 1-52 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-52 are allowed, and also for the reasons, as already of record, based on the decision of the BPAI dated January 23, 2008. The references of record including Yamazaki I (5,365,080), Yamazaki (5,893,730), Andra (IEEE Article, 1997, pp 639-42), Admitted Prior Art, etc., alone or in combination, do not anticipatively disclose each and every aspect of the claimed method, or fairly make a prima facie obvious case of the claimed method, in combination with other processing claimed limitations as recited in base claims 31,33,34,36, the inclusion of having the first regions of the upper surface of the semiconductor film overlapping with only a portion of the second region of the upper surface along the first direction (base claims 31,34) or along the short direction of the laser beam (base claims 33,36) by forming a first crystalline region by irradiating a first region of the upper surface of the amorphous semiconductor film with a first laser beam by relatively moving the first laser beam in a first direction (a short direction as recited in claims 33,36); and after forming the first crystalline region, forming a second crystalline region by irradiating a second region of the upper surface of the amorphous semiconductor film including a portion of the first crystalline region with a second laser beam by relatively moving the second laser beam in a direction parallel to the first direction (a short direction as recited in claims 33,36); wherein a wavelength of the first laser beams falls in a range of 370 nm through 650 nm, a wavelength of the second laser beams falls in a range of 370 nm through 650 nm, the first region of the upper surface of the semiconductor film overlaps with only a portion of the second region of the upper surface along the first direction (a short direction as recited in claims 33,36).
